

## **Join us for our special NLP Business Practitioner Programme**

We're delighted to be offering this unique 8-day NLP Business Practitioner Programme. It's been designed to help you develop powerful communication, rapport building, coaching and leadership skills.

NLP, or the Study of Excellence, has long been recognised as a powerful personal and business development tool. It's a way of decoding and reproducing what works in thinking, language and behaviour.

NLP is the study of the structure of your subjective experience. By increasing your awareness of the strategies people are using to achieve what they want, NLP helps you consistently achieve the results you want for yourself, your teams and your organisations.

### **What can you expect to achieve?**

By the end of this enriching programme you'll be able to:

- Respond resourcefully and creatively to events and changes in your work and personal life
- Understand and appreciate how you and others decipher everyday experiences, which in turn leads to more personal choice and influence
- Set compelling goals for yourself that will ensure you achieve the results you really want for yourself and your business
- Develop a sensitivity to others and understand situations from different points of view and be able to take effective, balanced decisions to gain the co-operation and commitment of others
- Build business and personal relationships that are both fulfilling and successful
- Enhance learning though developing your ability to give and receive feedback
- Coach yourself and others towards achieving both your own and their true potential
- Be respectfully influential in line with your own values and with integrity
- Create strategies for achieving success in ways that are meaningful to you
- Communicate in ways that enhance understanding, trust and interest
- Be aware of your own and others use of language patterns and challenge, with elegance, those patterns to increase learning and change
- Motivate yourself and others by determining the values and criteria by which you and others make decisions
- Consider and adopt beliefs of excellence that support your personal and professional goals
- Identify and celebrate your own unique talents.

Imagine improving your communication skills, being able to get the results you want, assisting others in achieving their goals, and enabling yourself and other people to be more resourceful.

By successfully completing this programme, you'll gain a NLP Practitioner Certification, as well as powerful skills that will allow you to coach yourself and others towards fulfilling both your own and their true potential.

While our training covers the core syllabus required to attain a Practitioner Level Qualification, they're also tailored to reflect the individuality and uniqueness of each member of the group. As we work together you'll gain new insights and learning that will contribute to and enrich both your personal and business life.
